Add item

Customer's sale

Add the customer's items. Check the size and color before taking payment.

Only hand over goods after this screen confirms payment. Need help? Ask your manager and quote the order number.

Training example — synthetic items and payments.

1 Sign in

Use your own account. Open B Active cashier, then Open tablet checkout. Check your name. Keep the tablet online.

2 Add exact items

Search the product or SKU. Check size, color and quantity against the items in your hand. Tap Add item. Use + or – in the basket to adjust quantity.

3 Review the sale

Enter an email only if the customer wants a confirmation. Tap Review sale & payment, then read the final total to the customer.

Missing item, incorrect stock or wrong price? Stop and ask your manager.

Take cash

Training example — synthetic sale on the implemented cashier screen.

1 Count the money

Enter the cash you actually counted under Amount received (PHP). Check the change shown.

2 Confirm once

Tap Confirm cash received once. Wait for Payment received on the cashier screen.

3 Return the change

Return the displayed change. Continue to the invoice and handover steps on page 4.

An error does not mean the sale failed. Refresh the same sale before collecting again.

Customer's sale

Order #121

Ready for payment

1 x Training Everyday Skort - **P650.00**
Small, Sage

₱650.00

Confirm the items and total with the customer.

Cash

Amount received (PHP)

Change: ₱350.00

Confirm cash received

Pay digitally

QRPh · Maya · ShopeePay · GrabPay

[Cancel this unpaid sale](#)

Take a digital payment

Training example — synthetic sale on the implemented cashier screen.

1 Open the payment page

Tap Pay digitally. Ask the customer to scan the code with their phone camera. They choose QRPh, Maya, ShopeePay or GrabPay on the secure payment page.

2 Wait for confirmation

Keep this screen open. It checks automatically; you can also tap Refresh payment status. Wait for Payment received before continuing to page 4.

3 Keep the same sale

If payment remains pending, keep the goods and ask a manager. Do not switch to cash or create a replacement sale.

The displayed code opens a website. It is not the bank-app QRPh code. Never use a customer screenshot as proof of payment.

Customer's sale

Order #121

Waiting for payment

Waiting for server payment confirmation. Do not collect again.

1 × Training Everyday Skort - **₱650.00**
Small, Sage

₱650.00

Keep the goods with you. Wait for "Payment received" on this screen.

Customer: scan with your phone camera, then choose how to pay. This opens the payment page; it is not a bank-app QR code.

Open secure payment page

Refresh payment status

Write the invoice and hand over

Training example — synthetic sale on the implemented cashier screen.

1 Check payment

The cashier screen must say Payment received. Recheck the items, sizes, colors and any change.

2 Write the invoice

Issue a registered handwritten invoice for every sale. Enter its serial number under Handwritten invoice number.

3 Give the customer their purchase

Give the invoice, goods and any change. Tap Confirm invoice & hand over goods as you hand them over.

Only the manager may resolve payment or stock exceptions. Never bypass a pending or review message.

Customer's sale

Order #89

Payment received

1 x Training Everyday Skort - Small, Sage	P650.00
---	----------------

₱650.00

Write the invoice, return any change, and confirm the items are ready to hand over.

Handwritten invoice number

TRAIN-0002

Confirm invoice & hand over goods

Finish the sale

Training example — synthetic sale on the implemented cashier screen.

1 Check completion

Confirm Sale complete and the invoice number, then tap Start next sale.

2 Handle email requests

Submitted to email service means accepted for sending, not delivered. Use Resend email confirmation if needed. Resending does not collect payment again.

3 Sign out

Use Sign out when finished. An unfinished sale remains linked to your account; sign back in with the same account to resume it.

The email is an order/payment confirmation, not a BIR tax invoice. Always give the handwritten invoice.

The screenshot shows a mobile application interface for a cashier. At the top, it says 'Customer's sale' in bold. Below that is 'Order #89'. A green banner reads 'Sale complete'. Underneath, it lists '1 x Training Everyday Skort - Small, Sage' with a price of 'P650.00'. A horizontal line separates this from the total, which is 'P650.00' in large, bold text. Below the total is the invoice number 'TRAIN-0002'. At the bottom is a large orange button labeled 'Start next sale'.

Dos and donts

Do

Use your own account. Check exact variations. Count cash. Read the final total. Wait for the cashier's payment confirmation. Issue a registered handwritten invoice for every sale.

Do not

Accept payment screenshots. Hand over while pending. Change a pending digital sale to cash. Create a replacement sale after an error. Use a separate QR or payment link. Share accounts or adjust inventory yourself.

When to stop and ask for help

Waiting for payment

Keep the goods. Refresh this sale. Ask a manager if unresolved.

Manager help needed

Stop. Quote the order number. Do not collect again or hand over goods.

Connection lost

Keep the page open. Reconnect and refresh the same sale.

Check the previous request

Tap Resume this sale. Retry this same sale, if shown, repeats the original reference and items without taking payment.

Sale cannot be found

Ask a manager to check your active sale. Do not create a replacement.

Wrong basket after review

Use Cancel this unpaid sale only if available. Wait for cancellation before starting the corrected sale. Otherwise ask a manager.

Refund exchange or discount

Ask a manager. These actions are not available at the cashier.

Email sending failed

Resend the email confirmation. Do not repeat checkout.

Always quote the order number when asking your manager for help.
