

B Active checkout checklist

Use after manager release approval. Keep beside the store tablet.

1 Check the items

Correct product, size, color and quantity.

2 Review the final total

Tap **Review sale & payment**. Read the final amount to the customer.

3 Collect once

Cash: count it, enter amount, confirm. **Digital:** customer scans with phone camera and pays on the secure page.

4 Wait for Payment received

Keep the goods until this cashier screen confirms payment.

5 Write the invoice

Issue a registered handwritten invoice for **every sale**. Enter its number.

6 Hand over and finish

Return change, give invoice and goods. Tap **Confirm invoice & hand over goods**. Check **Sale complete**, then **Start next sale**.

Stop and ask a manager

Payment pending or unclear, lost connection, wrong stock or total, return, refund or exchange. **Keep the same sale open. Quote the order number. Do not collect again.**

Do not

Accept payment screenshots. Hand over while pending. Switch a pending digital sale to cash. Create a replacement after an error. Use a separate QR/payment link. Share accounts or change stock yourself.

Optional email

Submitted to email service does not mean delivered. Use **Resend email confirmation** if needed. Email does not replace the handwritten invoice.
